DETAILED ACTION

Allowable Subject Matter

1. Claims 1-15 are allowed.
2. The following is a statement of reasons for the indication of allowable subject matter:
3. The present invention teaches a method for initializing and personalizing a chip card. Each independent claim identifies the distinct feature of a plurality of personalization descriptors associated with an application where the personalization descriptors include the relative memory address of the next successive personalization descriptor in the list of personalization descriptors associated with the application. The closest prior art, Younger US Patent No. 4,874,935 teaches the personalization of chip cards, but fails to teach the particular addressing scheme of the instant application and thus fails to anticipate or render the above limitations obvious.
